liners that live

TRADE MARK

LINING-OUT STOCK

It Pays To Plant Willis Pot-Grown Liners

Better Stands. Pot plants have a better root system and stand the shock of transplanting better than bare root stock.

Better Growth. Pot plants start off quicker and make a better first season growth; thus they are ready to be marketed sooner.

You Can Plant Later. Pot plants can safely be set out in the field much later than bare root stock. This gives you more planting time in your busy season. With irrigation you can plant nearly all summer.

Rose Pots. Our potted liners are in rose pots which are deeper than ordinary pots; thus you get larger root systems and stronger plants.

SHRUBS

	Per 100 Each	Per 1000 Each
